However, the last version, Photoshop CC 2017, did work properly in 64-bit mode, and it should work just fine in future versions of Win 10. Regarding compatibility with new Intel processors, some models do work, for instance, Nikon D5100 and Canon 550D. However, it's not clear if all or most of the new models function as they did with Lightroom 4. And some don't. Reader feedback is appreciated.
